

AFMV- Application for Minor Variation to an Existing Building Consent

Building Consent Number:	
---------------------------------	--

Building (Minor Variation) Regulations 2009

(1) A **minor variation** is a minor modification, addition, or variation to a building consent that does not deviate significantly from the plans and specifications to which the building consent relates.

(2) The following are examples of minor variations and do not constitute an exhaustive list:

- a) substituting comparable products (for example, substituting one internal lining for a similar internal lining):
- b) minor wall bracing changes:
- c) a minor construction change (for example, changing the framing method used around a window):
- d) changing a room's layout (for example, changing the position of fixtures in a bathroom or kitchen).

(3) The examples in subclause (2) are only illustrative of subclause (1) and do not limit it.

(4) To avoid doubt, a minor variation does not include any building work in respect of which compliance with the building code is not required by the [Building Act 2004](#).

For further information: [MBIE Guidance-What is a minor variation?](#)

Minor Variations do not include a significant change from the consented building design and/or scope of work. These need to be dealt with through the Amendment to Building Consent process. Examples of Amendment include, but are not limited to:

- alterations that change the footprint of the building,
- location of internal loadbearing support (load path change),
- significant structural engineers design (more than simple/easy-grant approval with PS1)
- significant roof structure changes or revised fire safety aspects.

For further information: [MBIE Guidance- Minor variation or amended building consent?](#)
